

체크포인트 1. 조 W&B Team - 결석으로 초대를 못 받아 개인 계정 사용

결석해서 조 W&B Team 초대를 받지 못해, 개인 계정(jeongbin511-sungkyunkwan-university)에 기록함
개인 계정 화면: 좌측 Projects에 bitamin17-week3-churn, 최근 활동에 RF run 5개

1-1 of 1

체크포인트 3. 실험 비교 - 정렬한 Runs 표 + Parallel coordinates

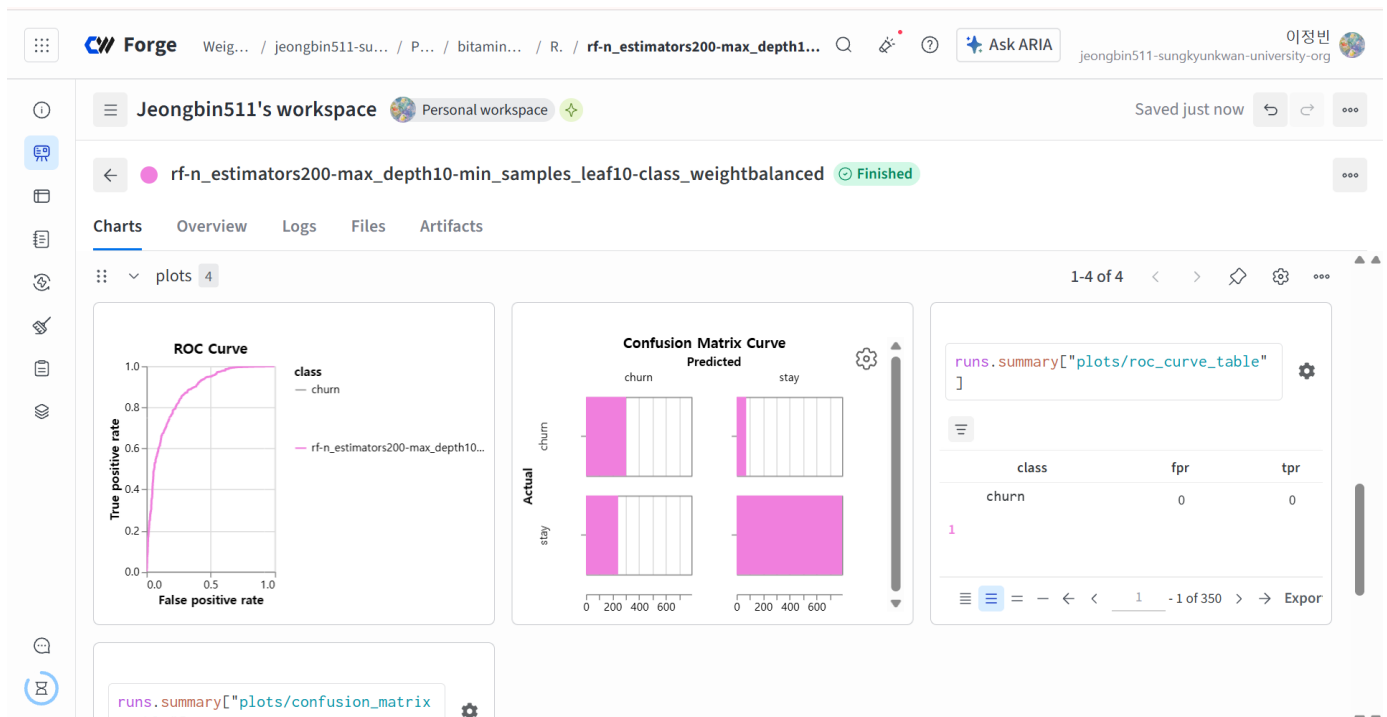

Runs 표: valid/roc_auc 순 정렬, valid/recall·gap/roc_auc 추가, Group = model

Parallel coordinates: max_depth → gap/roc_auc → valid/roc_auc (선 4개, null = 기본 RF)

체크포인트 4. 평가 그래프 - 혼동행렬 · ROC 곡선

RF depth 10 · leaf 10 run 페이지 > Charts > plots (valid 기준)

체크포인트 5. 최종 모델 저장 - churn_model.joblib + Artifact

python week3/train.py --model rf --max_depth 10 --min_samples_leaf 10 --save

W&B Artifact churn-model:v0 (5.4MB) / models/churn_model.joblib 5,404,539 bytes

The screenshot shows the W&B Forge interface. On the left, the 'Artifacts' sidebar lists the project structure: model > churn-model (v0 latest) and wandb-history. The main panel displays the 'churn-model' artifact details for 'Version 0'. A 'Version overview' table provides the following information:
